Re: Pagel's Pit Site--Data

Dear Mr. Hamper:

Please send me the results for the field parameters for the sampling that was done in November 1993; these were not included in the January 18, 1994 technical memorandum (at least I have not found them). Please show for the conductivity measurements whether they are for 25°C or for the temperature measured in the field (I would appreciate receiving both, as was done for the results of the most recent sampling in the southeast corner). I would like to obtain an advanced copy as soon as possible (my fax number is 312-886-4071).

Also, could you find out and let me know whether the conductivity results presented in the report for the remedial investigation dated March 1991 were at 25°C or at the measured temperature, which was not given.

If you have any questions, please call me (312-886-4746).

Sincerely yours,

Bernard J. Schorle  
Remedial Project Manager
